Summary

Backend-focused Full Stack Developer primarily working with the MERN stack, with experience across FARM stack. Built AI-powered, real-time, and backend systems involving semantic search, AI agents, MCP, and scalable media pipelines using React, Node.js, FastAPI, and MongoDB.

Experience

Full Stack Developer

Nov 2025 – Apr 2026

Waybeyond Tech

- Built and contributed to production systems spanning semantic search, investor workflows, real-time communication, and enterprise catalogue management.
- Developed vector-based semantic search (Vibe Query) using embeddings, Pinecone, and REST APIs.
- Implemented media pipelines with validation, image compression, and chunked video uploads to AWS S3.
- Refactored media storage from public URLs to metadata-based architecture using UUIDs, object keys, and media types with dynamic retrieval.
- Built onboarding workflows with email verification, authentication, and user activation.
- Developed search, filtering, pagination, and sorting APIs for product datasets.

Front End Developer

Dec 2022 – Feb 2023

Alhansat Solutions (Remote)

- Developed responsive UI using HTML, TailwindCSS, and JavaScript.
- Improved engagement by 40% through cross-device responsive design.

Technical Skills

Languages: JavaScript, Java, Python, HTML, CSS

Frontend: React.js, Next.js, Vite, Tailwind CSS

Backend: Node.js, Express.js, Hapi.js, FastAPI, REST APIs

Databases: MongoDB

AI / GenAI: Codex, Antigravity, Claude Code, Hugging Face, Pinecone, MCP, Prompt Engineering

Tools: AWS S3, Git, GitHub, Postman, Netlify, Swagger/OpenAPI

Projects

Collaborator

Waybeyond Tech

- Built a mobile-first service communication platform enabling real-time updates between staff and customers throughout vehicle servicing.
- Implemented media handling with pre-upload validation, image compression, and chunked video uploads to AWS S3.

RAYIB

Waybeyond Tech

- Contributed to an investor-founder platform with outreach, communication, and internal user management workflows.
- Implemented email-based onboarding with identity verification, password setup, and account activation.

Catalogue Management System

Waybeyond Tech

- Built product search with debouncing, pagination, filtering, and sorting APIs.
- Integrated AWS S3 for multimedia storage and product asset management.

Ticket Tamer

Personal

- Built an AI-powered full-stack ticketing system with JWT authentication and role-based access control.
- Automated background ticket workflows and AI-based ticket analysis using Inngest and Google Gemini.

Overwatcher

Personal

- Built a guarded AI agent platform using Google Gemini and MCP with dynamic tool discovery and function calling.
- Implemented a policy engine intercepting every tool call and human-in-the-loop execution.
- Built an MCP client supporting local stdio and Streamable HTTP with runtime policy updates and audit logging.

Certifications

Oracle Cloud Infrastructure 2024 Generative AI Certified Professional – Oracle

ChatGPT Prompt Engineering for Developers – DeepLearning.AI

Education

B.E. in Computer Science

2020 – 2024

Sinhgad Institute of Technology, Lonavla
